Forward-Looking Statements

This presentation contains forward-looking statements, including, but not limited to, statements regarding Synopsys, Inc.'s (Synopsys, we or our) short-term and long-term financial targets, expectations and objectives including, among others, our long-term financial objectives, which include the anticipated effects of our pending acquisition of ANSYS, Inc. (the Ansys Merger); our products, technology and services; business and market outlook, opportunities, strategies and technological trends, such as artificial intelligence (AI); the Ansys Merger, including, among other things, the anticipated timing of closing, the status of the related regulatory approvals, and its expected impact; planned dispositions and their expected impact; the potential impact of the uncertain macroeconomic environment on our financial results, including, but not limited to, the effects of sustained global inflationary pressures and elevated interest rates, potential economic slowdowns or recessions, supply chain disruptions, geopolitical pressures, including, among others, the unknown impact of current and future U.S. and foreign trade regulations, government actions and regulatory changes, such as export control restrictions and tariffs, and regional or global military conflicts, and fluctuations in foreign exchange rates, and associated global economic conditions; customer demand and market expansion; our planned product releases and capabilities; industry growth rates; the expected realization of our contracted but unsatisfied or partially unsatisfied performance obligations (backlog); software trends; planned stock repurchases; our expected tax rate; and the impact and result of pending legal, regulatory, administrative and tax proceedings. These statements involve risks, uncertainties and other factors that could cause our actual results, time frames or achievements to differ materially from those expressed or implied in such forward-looking statements. Such risks, uncertainties and factors include, but are not limited to: macroeconomic conditions and geopolitical uncertainty in the global economy; uncertainty in the growth of the semiconductor and electronics industries; the highly competitive industry we operate in; actions by the U.S. or foreign governments, such as the imposition of additional export restrictions or tariffs; consolidation among our customers and our dependence on a relatively small number of large customers; risks and compliance obligations relating to the global nature of our operations; failure to complete the Ansys Merger on the terms described in our filings with the Securities and Exchange Commission (SEC), if at all; failure to obtain required governmental approvals related to the Ansys Merger or the imposition of conditions to such governmental approvals that may have an adverse effect on us; failure to realize the benefits expected from the Ansys Merger; and more. Additional information on potential risks, uncertainties and other factors that could affect Synopsys' results is included in filings we make with the SEC from time to time, including in the sections entitled "Risk Factors" in our latest Annual Report on Form 10-K, and in our latest Quarterly Report on Form 10-Q. The financial information contained in this presentation should be read in conjunction with the consolidated financial statements and notes thereto included in Synopsys' most recent reports on Forms 10-K and 10-Q, each as may be amended from time to time. Synopsys' financial results for its second quarter of fiscal year 2025 are not necessarily indicative of Synopsys' operating results for any future periods. The information provided herein is as of May 28, 2025. Synopsys undertakes no duty to, and does not intend to, update any forward-looking statement, whether as a result of new information, future events or otherwise, unless required by law.

Regulation G

In addition to financial results prepared in accordance with Generally Accepted Accounting Principles (GAAP), this presentation also contains certain non-GAAP financial measures. When possible, Synopsys provides a reconciliation of non-GAAP financial measures to their most closely applicable GAAP financial measures. Reconciliations of certain of the non-GAAP financial measures (either contained in this presentation or given verbally) to their most comparable GAAP measures are included in the table at the end of this presentation, along with the second quarter of fiscal year 2025 earnings release and financial supplement, dated May 28, 2025, and available on Synopsys' website at <https://investor.synopsys.com/overview/default.aspx>. Synopsys is unable to provide a reconciliation of its long-term, multi-year target for annual non-GAAP EPS growth and certain third quarter and full fiscal year 2025 non-GAAP financial targets to the corresponding GAAP financial measures on a forward-looking basis because Synopsys believes that it would not be possible for it to have the required information necessary to quantitatively reconcile such measures with sufficient precision without unreasonable efforts due to, among other things, the potential variability and limited predictability of the excluded adjustment items necessary for a full reconciliation such as certain acquisition/divestiture related items, restructuring charges, tax deduction variability, changes in the fair value of non-qualified deferred compensation plan, and gains (losses) on the sale of strategic investments. For the same reasons, Synopsys is unable to address the probable significance of the unavailable information. Investors are encouraged to review Item 2.02 of Synopsys' Current Report on Form 8-K filed on May 28, 2025, for additional information about the measures Synopsys uses to evaluate its core business operations.
